To whom it may concern:I am in opposition of HR 4026. Not only do I pay for my XM subscription to be able to hear what I want when I want, it helps me perform my job. I am an Over The Road Truck Driver and I rely heavily on accurate, up the moment weather and traffic conditions. Driving in adverse conditions while trying to find a local radio station to advise me of these conditions is hardly safe! With my XM it doesn't matter what state I am in I have the information I need to stay safe out here on the road.

Sincerely,  
Brian Padon
